

SEROMA LIMITED
DELIVERY APP MANUAL
(PHONE APP)

2. SEROMA DELIVERY APP

The delivery app is an android based Application that can be downloaded from the link below.

<https://play.google.com/store/apps/details?id=cert.my.seroma>

The app is to be used by the drivers to track the delivers assigned to them and also manage documents and product acquisitions from the suppliers. Below are the step wise screens of the various functionalities of the application.

Login

As in Fig 1, the driver logs in using his unique phone number (starting with 256 eg 2567*****) and code as entered by the transport manager on the POD system.

Dashboard

Once successfully logged in, the app will redirect the driver to the dashboard page which is as seen in Fig 2. Clicking on any of the statistic displays takes the driver to a screen with the related information.

Pending Deliveries

As seen in Fig 3, any pending deliveries will be displayed in a list format. Clicking on them opens a dialog menu to help the driver manage the delivery transaction.

Receive Products (from supplier)

For deliveries that require the driver to receive goods from the supplier (Supplier to Customer), the driver will click on the dialog menu item with the option “Receive Products” as in Fig 4.

The driver then proceeds with the steps in Fig 5, 6, 7 and 8 to scan the documents that indicate receipt of the goods.
